

DOPONT

CEMENT POWDER PAINT

Aqueous cement powder used for coating exterior and interior concrete surfaces, resistant to extreme weather conditions.

Packages: DOPONT / 3 kg

Color: white - off-white

Clean the surface to be painted with water.

Mix the powder with half its weight of water and leave for about half an hour . Then add to it the same amount of water added previously.

Then it is ready to use .

Note: Spray the painted surface well with water after it dries .
